

Our Footprint Matters

Lewis Funeral Services realise that it has a responsibility to look after the environment. Our family business is committed to minimise its carbon footprint as much as possible by:

- Vetting all suppliers in its supply chain, making sure they are also dedicated to look after our world.
- Investing in Ground Source heating systems for Afallon Funeral Home and associated buildings.
- Investing in Solar PV panels to help with the electricity supply for Afallon Funeral Home, associated buildings and workshops.
- Recycling as much as possible.
- Owning and maintaining a woodland.
- Promote and partake in tree planting.
- Fitting energy efficient lighting within all buildings.

We continue to monitor our activities and consider it a priority to invest in products and methods that will safeguard a healthier planet for the future generations.
